DATABASES: PostgreSQL, SQLite, ActiveRecord

METHODOLOGIES: Object Oriented, Restful, MVC, TDD, Agile

FRONT END: HTML5, CSS3, Zurb Foundation, JQuery, Bootstrap

VERSION CONTROL: GitHub, Git

EDUCATION

Dev Bootcamp
2016

Dev Bootcamp is a 19 week immersive full stack web development program that focuses on the fundamentals of Ruby, Rails, Javascript, HTML and CSS.

Florida State University
Bachelor of Arts Commercial Music
2008

ACTIVITIES

Live Music Performance
Jan 2005 to Current

Performed and wrote music for various indie rock, soul, and electronic bands.

Film Maker · Writer / Composer
Jan 2014 to Current

- Co-wrote and composed the music for two films that were screened at several festivals in NYC.

IMDB:<http://www.imdb.com/name/nm7107105>

PROJECTS

Watch With Friends

An online platform for connecting those who need a place to watch TV to those with access to shows or films.

- Used a rails back end along with AWS S3 Cloud storage and private pub messaging to create a sharing-economy app for the web
- Designed the front end with Foundation, CSS, and HTML5
- Led a team of two developers, assigning roles, and making the decisions to pivot or change course when needed
- Presented completed project to assembly of over 50 in person guests, and over 200 streaming viewers

Sudoku Solver

A web app that can solve any possible Sudoku puzzle.

- Used a rails back end with basic HTML on the front end
- Uses both iteration and recursion with ruby to come up with solutions

NBA Drives

A single page web app that provides a graphic representation of every player in the NBA's drives

- Avoided needing a database by using the NBA's API for all data
- Used HTML, CSS, and JavaScript with jQuery to dynamically display data on the page

Yonder

Yonder is a web app, texting app, and iOS app that helps pastoralist farmers locate their nearest fresh water source and get information about the weather.

- Won the award for "Greatest Galactic Impact" at NASA's NYC Space Hackathon in 2016
- Used Ruby on Rails with HTML, Javascript, and Bootstrap to create the web app
- Incorporated Twilio for SMS texting features
- Used Swift to create the iOS application

EMPLOYMENT

The Rock Shop

Senior Talent Buyer · May 2012 to Current · Brooklyn, NY

- Communicate and negotiate with agents and managers to book touring and local artists
- Embed The Rock Shop into the New York City music community by participating in events like CMJ Music Marathon, CBGB Fest and various community and charity events
- Organize and conduct bi-weekly meetings with ownership and management to ensure the venue is running at maximum proficiency
- Analyze financial data, musical genre, and demographic information in order to identify what makes an event successful
- Input concert information, run reports, and manage box office using TicketFly's online ticketing platform

The Bowery Electric

Venue Assistant · May 2011 to May 2012 · Manhattan, NY

- Assisted the general manager with booking artists for live performances
- Promoted performances using various social media networking websites
- Wrote press releases for events to ensure maximum attendance from targeted audience
- Managed online ticketing with Ticketweb

Play More Music

Teacher · Oct 2008 to Feb 2011 · Atlanta, GA

- Gave students of all ages guitar, piano, saxophone, and drum lessons
- Taught music theory, technique, and artistry
- Helped with organizing and running recitals for over 100 students
- Analyzed and discussed musical pedagogy with management to ensure effectiveness as a teacher
